

Packaged spiral freezer

The solution for baked goods, meat, poultry, vegetables, potato products and ready meals when freezing or cooling in a medium-capacity range and in a limited space

- Operational in days due to the Modular Design and can be easily relocated, if needed. Capacities up to 12,000 pounds Per hour.
- 10 Year Warranty is provided with the Fully Welded Enclosure. AFE has been providing these since 1990.
- Fully Welded Support Rails for maximum Hygiene. Plastic or Metal Belting can be utilized
- Full Clean-In-Place is provided that works much more effectively because the Drives and Bearings are located outside the enclosure. Full Steam Pasteurization also available.
- Freezer can be located externally to save valuable inside plant floor space and qualifies for favourable IRS asset depreciation.
- Stainless Steel Tube Coils are provided with Aluminium fins. Sequential or Air Defrost can be provided for extended

We service the industrial sector by providing cooling and freezing equipment for food processing facilities. Our goal is to provide the most hygienic, energy efficient and reliable equipment available in the world
