The outside driven system allows for positive engagement where the greatest tension/force of the belt is, helping to extend belt life.

The versatility of this application allows for multiple, independently controlled, product lines to feed into ONE freezing atmosphere/enclosure reducing overall footprint.

The inside positively driven drum system is a great solution for products that are cooked or par-cooked in fryers, vice the typical friction/slip drive drum systems. This keeps belt tensions lower and maximizing belt life.

By partnering with AFE you are getting the most robustly built, hygienically designed, and efficient freezing solutions the industry has to offer. Our fully welded enclosures, having a 10 year warranty, proves we stand behind our designs and craftsmanship. Give us a call.
